

BRIGHT JOEL

Software Developer

Abuja, Nigeria | joelbright508@gmail.com | +234 904 052 2602 | tobijoel.com.ng | [LinkedIn](#)

PROFESSIONAL SUMMARY

Final-year Software Engineering student at Baze University (2026) with a strong track record of building and shipping full-stack web applications and AI-powered products for real users. Delivered 4 live products across e-commerce, real estate, education, and sports-tech — all deployed on custom domains with real users. Currently holding multiple concurrent engineering roles as a Frontend Developer, AI & ML Intern, and Freelance Software Developer. Passionate about turning ideas into reliable software that creates genuine value. Seeking a full-time role where I can ship fast, grow technically, and contribute within a strong engineering team.

WORK EXPERIENCE

Frontend Developer

Zenom Tech — Remote · April 2026 – Present

Build and maintain production UI features using React and TypeScript, translating design mockups into responsive, accessible components served to real end users. Own frontend architecture decisions, ensure API integrations are clean and reliable, and actively contribute to code quality across the codebase helping the team ship faster with fewer regressions.

AI & Machine Learning Intern

Techy Jaunt — Remote · April 2026 – Present

Work on practical AI/ML projects that bridge research and product applying Python frameworks to preprocess data, integrate models, and build automation workflows that make AI outputs genuinely useful within business contexts. Gaining hands-on experience operationalising machine intelligence beyond the notebook into functional software pipelines.

Freelance Software Developer

Self-employed — Remote · January 2026 – Present

Deliver end-to-end software solutions for Nigerian businesses, spanning full-stack web development, AI chatbot development, SEO, and graphic design. Manage complete project lifecycles from client scoping through deployment and post-launch support, consistently shipping production-quality work on custom domains, on time and to brief.

Python Programming Intern

HIIT Plc — Remote · February 2026 – April 2026

Built Python automation scripts and internal tools that reduced manual data-handling effort for the team, improving processing accuracy and freeing up time for higher-value work. Contributed to streamlining operational workflows within a structured professional programme, applying clean, production-quality Python throughout.

Backend Development Intern

Elkanah IT Technologies — Ilorin, Kwara State · September 2025 – December 2025

Embedded within a professional engineering team building a student management system for academic institutions. Designed and implemented REST API endpoints using ASP.NET Core — taking features from requirements through database schema design, controller logic, validation, and testing. Delivered complete CRUD modules now live in production, participated actively in code reviews, and debugged real API issues collaboratively.

PROJECTS

NaijaThreads — Nigerian Fashion E-Commerce Store

Stack: React · TanStack Router · Node.js/Express · MongoDB · Cloudinary · Paystack

[Project Link](#)

Addresses the lack of a reliable, mobile-optimised storefront for Nigerian fashion businesses. Built with a full product catalog, shopping cart, and Paystack-powered checkout that Nigerian consumers trust. Deployed on Cloudflare Workers with a custom .ng domain and engineered mobile-first for local network conditions, giving fashion businesses a credible digital presence that converts browsers into paying customers and reduces dependence on informal WhatsApp orders.

T Homes — Real Estate Property Listings Platform

Stack: React · TanStack Router · Supabase · Cloudflare Workers

[Project Link](#)

Replaces scattered, unreliable property searches with a clean listings platform featuring 30+ properties, interactive Leaflet maps, Nigerian city photo cards, and URL-parameter-based search. Property seekers can browse and filter verified listings on a real map from their phone; agents and landlords gain qualified visibility to intent-driven users. Independently migrated from a Lovable scaffold to a fully self-managed Supabase backend, owning the complete data layer.

TechBridge — EdTech Learning Platform

Stack: React · Supabase · Cloudflare Workers · Paystack

[Project Link](#)

Bridges the gap in affordable, locally relevant tech education for Nigerian students. Provides structured courses with Nigerian-priced Paystack payments, content scoped to skills demanded by local employers, and a fast-loading experience designed for students on limited connectivity. Designed and seeded the full course and lesson database schema from scratch, deployed on Cloudflare Workers for reliable nationwide access.

Ninety Minds — Grassroots Football Scouting Platform (Co-Founder)

Stack: React · Node.js · Cloudflare Workers

Live link coming soon

A social enterprise platform giving talented Nigerian grassroots footballers digital profiles and direct visibility to scouts and clubs — solving the discovery gap that costs gifted players their careers. Also integrates mental health support resources for young athletes, addressing psychological pressures that are real but largely unacknowledged in Nigerian grassroots sport. Currently in active development — live link coming soon.

EDUCATION

B.Sc. Software Engineering — Baze University, Abuja

Expected Graduation: 2026 · Relevant Coursework: OOP, Data Structures, Compilers, Database Systems, Software Engineering

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Python, SQL, HTML, CSS

Frontend: React, TanStack Router, Tailwind CSS, Vite

Backend: ASP.NET Core, Node.js, Express.js, FastAPI

Databases: Supabase (PostgreSQL), MySQL, SQL Server, MongoDB

AI & Machine Learning: Claude API, NumPy, Pandas, Scikit-learn, TensorFlow, Data Preprocessing

Deployment & Tools: Cloudflare Workers, Vercel, Git, GitHub, Postman, VS Code

Design: UI/UX Design, Figma, Graphics Design

ADDITIONAL

- Portfolio at tobijoel.com.ng — all projects with live demos and case studies.
- Freelance services: web development, AI chatbots, SEO, and graphic design for Nigerian businesses.
- Available for full-time, part-time, or contract roles — immediate start.
